- View unconfirmed presences
- Download my unconfirmed presences
- View treatments and basic treatment info
- Create individual projects

Advanced Account

Roles assigned by your iMap Admin or Organization Administrator

Jurisdiction or Organization Members

- All permissions from Basic Account
- Create treatments in my jurisdiction
- View detailed treatments in my jurisdiction and/or my organization
- Download my treatments

Organization Admin Account

Role assigned by your iMapInvasives Administrator

Organization Administrator

- All permissions from Advanced Account
- Assign members to my organization(s)
- Create organization projects
- Download my organization's data, including unconfirmed presences and treatments

Species available depends on geographic location where a user is viewing or creating a record. Users view/create FL species records in FL, NY species in NY, etc. A smaller list of species is available in areas without an active iMapInvasives program.
